

Are you ULEZ Ready?

ADVERTISER'S ANNOUNCEMENT

ULEZ (Ultra Low Emission Zone) is expanding across all the London Boroughs from 29th August 2023. Are you ready for the financial impact this could have on you and your family if you have a non-compliant vehicle? Now more than ever, the thought of driving an all electric vehicle looks like an attractive prospect.

As government approved electric vehicle charge point installers - www.gov.uk/electric-vehicle-chargepoint-installers - we have been inundated with residential and commercial installations. We can

“A fantastic experience from the initial enquiry right through to the installation. Elizabeth in the office was very friendly and efficient, followed by Calvin and Reece carrying out a high standard of work. I would highly recommend Hale Electrics for your EV Charger installation.”

Ken Peachy, Petts Wood.

claim back the government grants available for Landlords, those who own or rent a flat and people in and round the workplace (where eligible), to save you even more money.

Hale Electrics Ltd are committed to supplying and fitting a varied range of EV chargers for domestic and commercial use. We offer our clients a free site survey at which point we discuss the various installation options and the best chargers available. Please visit our instagram page - @hale_electrics - to see pictures of our many installations. We have 5 star reviews from many happy customers who have already dived into the world of electric vehicles.

Get in touch with us today and arrange your free site survey to start your Electric Vehicle journey.
